

It has come to my attention the National Association of Broadcasters is trying to stifle competition by lobbying against XM Radio. Particularly, the NAB is criticizing the Weather and Traffic now offered by XM.

I respectfully ask you to reject the NAB's petition 04-160 and prevent the NAB from limiting consumer choices on XM Radio. I have subscribed to XM Radio, because of the selection of programming and coverage that I receive. I can understand why the NAB is upset with XM, because I no longer listen to standard radio. However, it is a choice that I made that better fits my lifestyle. Please do not allow broadcast radio to strong arm the FCC into limiting the choices that consumers have when selecting the best radio for them.

Respectfully submitted,
